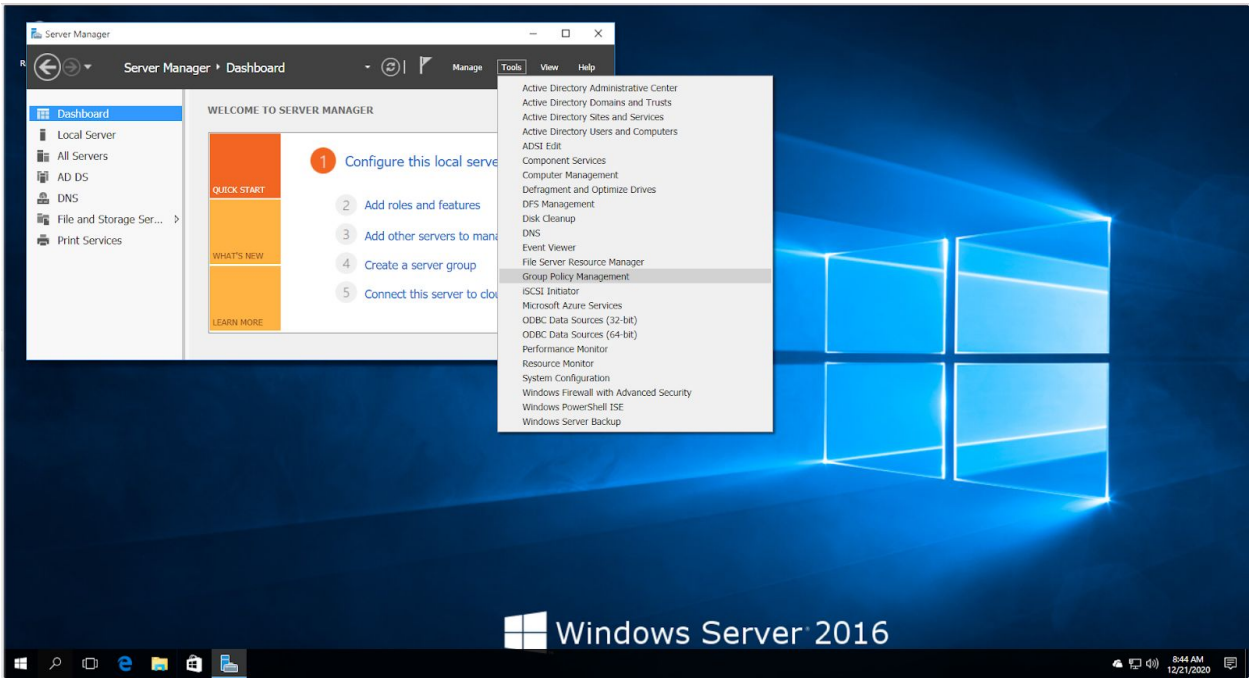
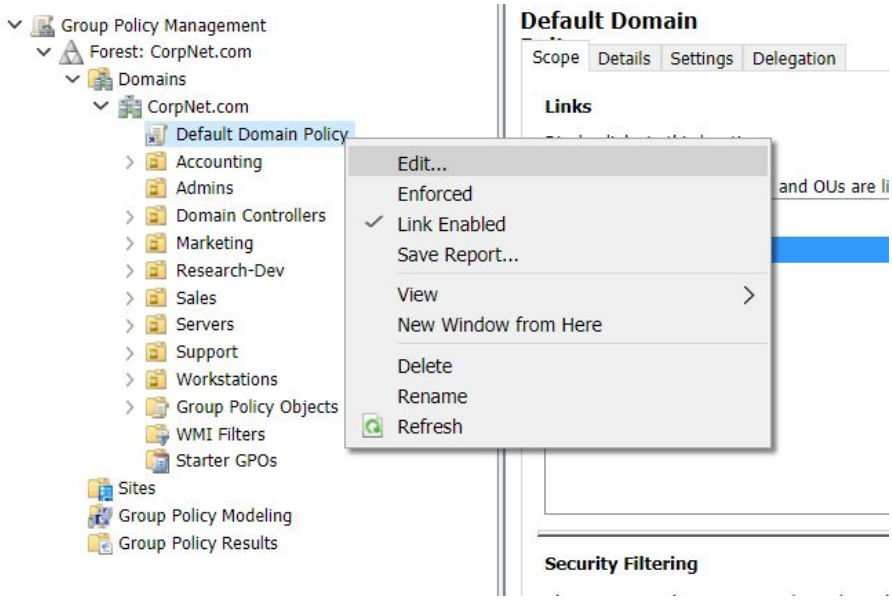
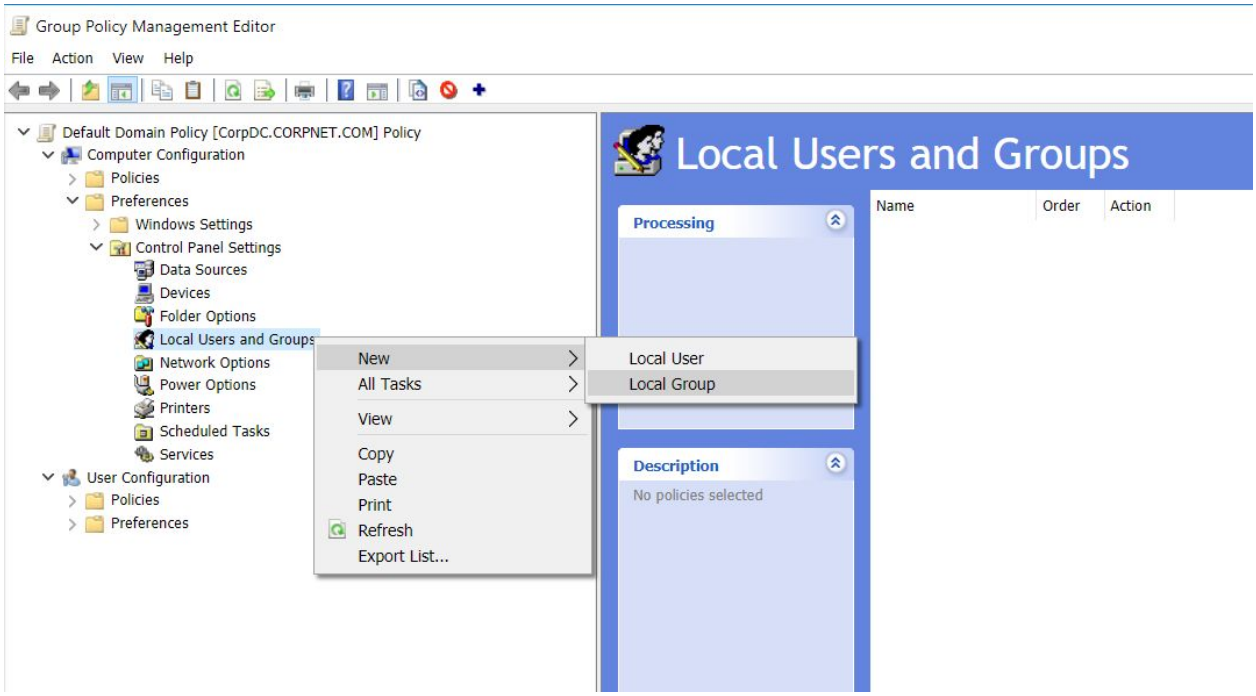
Restrict Local Accounts



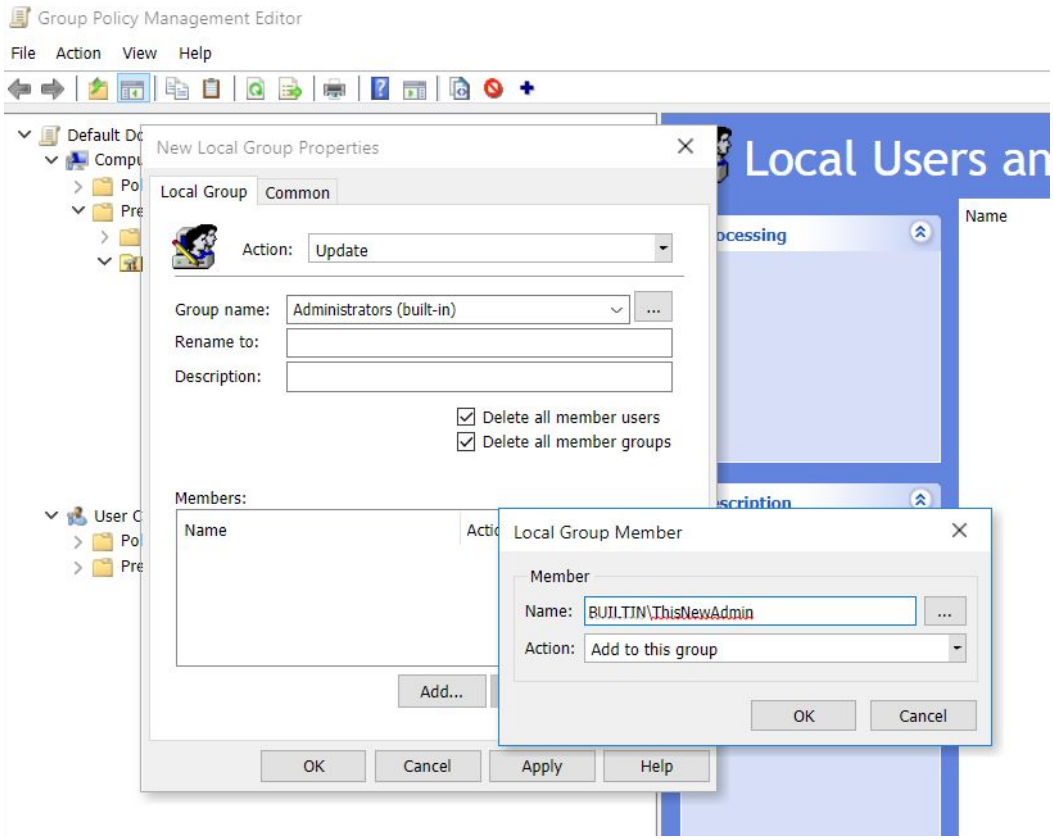
Server Manager → Tools → Group Policy Management



Open to the default domain and Edit.



Computer Configuration → Preferences → Control Panel Settings. Right-click Local Users and Groups and select New → Local Group.



Select **Administrators (built-in)** from the drop-down list. Select **Delete all member users** to remove all member users. Select **Delete all member groups** to remove all member groups. Click Add. In the Name field, enter **BUILTIN\ Administrator**; then click OK. Consider adding **%DOMAINNAME% \ Domain Admins** to this group.
